Manjusha Rakurty

Email:manjusha.developer@gmail.com   Ph:**+91 9949716166**

Technical Skills:

Programming languages : Python

Frameworks   : Django, Webapp2, Google App Engine

Operating Systems   : Linux

Others: Amazon WebServices S3 with BOTO(Python API)

Hands-On experience with REST Client API and JSON.

Software for Being Productive: Gvim, Git, virtualenv, pip

Experience:

Software Engineer
FADS Technologies, Hyderabad
May 2012-Present

 Having **1Year 11Months** of Experience , I have worked on below projects as
Python Programmer.

Project: <u>Unify</u>(Present):
   Company's internal website to maintain its employee records and also timesheet
   management which is accessible to particular domain and only for the company
   employees.
- Developing using Webapp2 framework with Google AppEngine as deployment server.

- Followed MVT model for project architecture.

- Modules developed are employee record maintenance, timesheets, employee

   assignments.

Project: <u>Ibeerbet</u>:
    Backend for Iphone App used for betting purpose in different leagues held in US.

- Developed API for the updation of game results of various leagues.

- Game results sent in form of notifications using PushWhoosh.

- Generating responses for the queried requests in Json Format using REST API.

- Developing each module using Webapp2 framework and Google App Engine.

- Used PYTZ library for changing of time zones across the world.

- Testcases for every module are written using Unittest.

Project: <u>Cantata</u> (Web application and Backend for Mobile App)

  Online music store where users can perform various actions and also includes various modules like PayPal.

- Developed using Webapp2, Google App Engine, JQuery, Bootstrap CSS

- Built an oauth authentication piece for the Google Apps for this project to allow single sign-on between Social Networking users and Google Apps, with minimal time and resources required.

- Wrote and deployed on Google App Engine ,keeping the code simple, and portable.

- JQuery code which is used for uploading instrumentals, for search bar, and for the player.

- Responsible for developing the skeleton in MVC model.

- Wrote TestCases and TestSuites using unittest and also using REST Client

Summay of Qualifications:

- Able to communicate effectively and clearly both in code and with the written word.

- Hands- on experience in developing web applications using Python on Linux platform.

- Sound knowledge of front end development HTML, JQuery, CSS.

- In-depth knowledge of designing, coding and testing web based applications.

- Constantly seeking the most concise, and efficient way to write code with a critical eye on complexity, size and readability.

- Driven to learn new skills, abilities, tools, or technologies with a true passion for acquiring knowledge, and the intelligence to excel at it.

Education:

Bachelor of Technology from JNTUK in Computer Science and Engineering with 76.26%
